

RFID Solutions for Marinas

Storage and Security

You can now locate, protect and secure all types of watercraft and marina assets using RFID solutions. RFID location technology, reduces the need for expense surveillance and monitoring equipment, onsite marine police and other storage and security services. Protect and locate assets on the ground as well as on the water.

A complete real-time inventory of these assets is available at all times. This capability can be used to monitor and manage the location of ships, boats or other assets while in storage on land or while docked during the boating season. Any significant movement of the asset can be reported and trigger a real time alert to a monitoring station which can be on or off the premises. Know when an asset is being moved without permission immediately; anytime - day or night.

During the chaos of opening and closing seasons you will have the ability to quickly identify and locate any tagged asset. That means no more time wasted trying to find a missing asset. The larger your operation the more time and money you will save, and your customers will enjoy the peace of mind knowing that their valuable asset is accounted for at all times.

The application middleware produces data that can also be used to bill for services by the year, by the month, by the week or by the season. Your customers can even be billed for just the time they use the facility. Customer ID Cards enabled with RFID can be integrated to provide identification, membership detail, privileges and controlled access to docks

FALKEN Secure Networks(FSN)—Your partner for RFID automation

If you choose to pursue RFID implementation in your organization, here is the FALKEN Secure Networks commitment to you:

- FSN will provide solution architects to work with you to define system requirements for your particular installation. Multiple locations can be networked together for a central and real-time view and centralized management.
- FSN will do a RFID site survey to validate radio frequencies, tag types, system design and performance
- FSN will provide all necessary hardware and software to make the system work for you
- FSN will integrate the system with your existing enterprise management software
- FSN will provide documentation for the system, including operating procedures
- FSN will train your people
- FSN will provide warranty and continued system support

For RFID-enabled Document Tracking and Management, FALKEN Secure Networks (FSN) and partners bring together the right technologies to give you control over your files and make your office run more efficiently. Our automated and secure processes save time and labor, and prevent problems before they occur. With FSN ,you get the latest, non-proprietary secure RFID technology with the most powerful and flexible RFID file tracking software available.

Contact Us

FALKEN Secure Networks is a specialized System Integrator, RFID Solution Architect, and Value-Added Reseller with focused expertise in the RFID site survey, cost-effective design, and turn-key project implementation.
