

High performance vehicle rugged notebook - GD6000

RUGGED RELIABILITY Bring on the temperature extremes, humidity, vibration, dust, drops and spills. Designed to meet even military rugged requirements (MIL-STD 810F), the GD6000 has a range of rugged features from the spill-resistant keyboard to the shock mounted display.

ULTRA-VIEWABLE TOUCHSCREEN DISPLAY Streaming sunlight may wash out other displays but you'll still see the GD6000 screen with its award winning 13.3" DynaVue® touchscreen display. So if you're outside, or even near a window, in low light or bright, this screen shines.

POWERFUL PROCESSING The GD6000 works as hard as you do. In fact, it can probably run circles around your desktop with the latest Intel® 2.53 GHz T9400 Core™2 Duo processor, an 1066 MHz Front Side Bus, 6MB L2 cache, up to 4GB DDR3 memory and the Intel GM45 Express Chipset.

COMPLETE WIRELESS CONNECTIVITY No matter your network or preferred wireless technology the GD6000 keeps you connected with up to four integrated wireless devices. WI-FI (WLAN), Cellular Data (WWAN), GPS, and Bluetooth with sophisticated RF shielding and noise filtering - your communication options cross the spectrum so you can count on coverage.

ERGONOMIC Computers shouldn't be uncomfortable. That's why the GD6000 was designed with you in mind - so you can carry it and use it without pain or strain. It's the thinnest, lightest durable computer and even includes keyboard lighting features so you can work efficiently and safely at night.

SECURITY The GD6000 has security features designed to protect users, information and networks. It includes TPM 1.2 Network Security Standard, integrated fingerprint reader, integrated CAC (Smart Card) reader, a removable hard drive, security lock slot and super password startup configurations.

WARRANTY + SERVICE Service and support are never an issue with a standard 3-year warranty. Plus enterprise customers can choose from a comprehensive suite of support levels including extra options like Mobile Help Desk.

SAVING ENERGY You can work longer while using less energy because the ENERGY STAR® certified GD6000 is designed with your productivity and the environment in mind. With sophisticated power management settings you can cut power consumption on both AC and battery, ultimately saving money while reducing greenhouse gas emissions. Additionally, our packaging is designed to reduce environmental impact. [Click here for more information about ENERGY STAR.](#)
